

**Fife Ch 24** → We think his name was William dates unknown, lived in Londonderry

**Note 1:**  
It is unclear whether John is actually the son of William. PT, RL2 and WD are project participants who are descended from him, but their DNA is unlike the other men in this Group. We have established a new Group for them, [Group 4c](#).

**Note 2:**  
Fife Ch 26 shows the descendants of Samuel b ca 1705 down to a man known to be an ancestor of JD in [Group 5b](#), but Y-DNA results show that JD can not be related to the other men in this group.
