

**Note 1:**  
Group 2c consists only of the descendants of William Ewing of Georgia. The other men in this chart are shown only to demonstrate that they cannot be related to him in the way Margaret Ewing Fife thought. See Note 2.

**Note 2:**  
Margaret Ewing Fife thought William b. ca1768 was the son of John b. ca1739, but this cannot be so if the conventional genealogies of the men in this chart are accurate, because the Y-DNA results of SA, ST, RD2 & RF are completely unlike those of JR, DP, RE SL2 & CW2, who constitute a tight cluster in Group 4. See also the [Group 4d Relationship Diagram](#).
